

Milkshakes made with Rustlin' Rob's Apple Cobbler in a jar

Ingredients

½ jar of [Rustlin' Rob's Apple Cobbler](#)

6-8 scoops vanilla bean ice cream

1-2 tbsp milk, optional

Directions

1. Put about half of need cobbler in a jar and about 5-6 scoops of ice cream in blender

Depending on the size of your blender you may need to add the milk. No milk will result in thicker milkshakes

2. Blend for about 30 seconds or until mixture is smooth then add in 1-2 more scoops of ice cream and the rest of the cobbler in a jar
3. Pulse a few times just until everything is fairly incorporated. (You're meant to have chunks of cobbler in a jar)
4. Top with extra cream or a dash of nutmeg and/or cinnamon to your liking.
